INTERNSHIP

MERN STACK

2025

Acquired practical experience in building applications using the MERN stack (MongoDB, Express, ReactJS, and NodeJS). This internship, conducted by The Better Tomorrow Technologies Institute, strengthened my full-stack development skills and deepened my understanding of real-world implementation of these technologies.

GAMING AND ANIMATION

2025

Developed immersive cross-platform games and animated experiences using VR technologies. Leveraged game engines and VR frameworks to create interactive content for platforms like Oculus, Android, iOS, and desktop. Designed 3D environments, real-time animations, and intuitive user interactions to deliver engaging virtual reality experiences from a single codebase.

PROJECTS

DRIVER DROWSINESS DETECTION SYSTEM

2024

Developed a real-time driver drowsiness detection system using Python and OpenCV to alert drivers and prevent accidents. Used facial landmark detection and eye aspect ratio (EAR) to track eye closure and detect fatigue. Integrated instant audio alerts and optimized for real-time performance under different conditions.

KNIGHTS DAME – A PLATFORMER GAME IN UNITY

2024

Created a 2.5D side-scroller game in Unity (C#), where a knight saves the princess by defeating and overcoming enemies and bosses.

GEAR SHIFT: ZOMBIE RACING

2025

"Gear Shift" is a fast-paced top-down racing game built in Unity, where players race through zombie-infested tracks. Players must dodge hazards, collect coins and health pickups, and outdrive AI opponents while surviving attacks from chasing zombies. Technology used: Unity.
